For your convenience, we can save the phone and fax number of the pharmacy closest to you in your computerized chart! We currently do all our charting with a medical charting program. It saves patients and office staff a lot of time. It also allows us to fax new prescriptions and refills right from our computers. This is faster, and easier to keep track of. Please enter as much info below as you know. We have **MANY** pharmacies saved in the program, so as little as name and number or name and location is all we need. Plus, you can always call us and change it at any time!!
